## HEATER BOOSTERS

**Boost the efficiency of your Heater by 40%. Just add a Heater Booster**

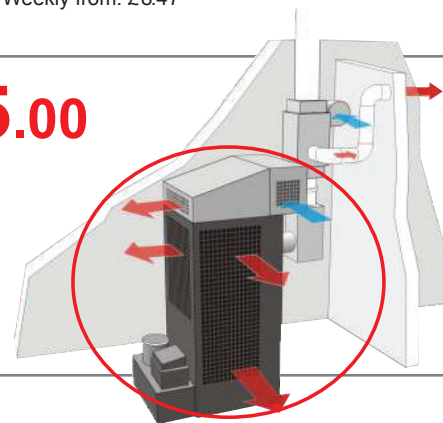

The heater booster is an in-line multipass stainless steel flue gas heat exchanger which can raise efficiency on HP heaters to over 90%. This means **over 40% more heat** is realised from your fuel that would otherwise be lost up the flue. A 220-240v supply is required for the fan. The booster simply slots onto any 150mm flue sector before the flue. The heat outlet can be ducted if required (see as illustrated).

**£285.00**

**IMPROVES HEATER EFFICIENCY BY 40%**

## HOW MUCH HEAT DO I NEED TO GENERATE?

Here is your step by step guide for working out how much heat you need.

- Area to be heated, length.....feet, width.....feet, average height.....feet
- Multiply, length x width x average height = volume.....cubic feet
- Select the description which best suits the area to be heated from the table below and fill in the appropriate Btu/cu.ft figure here.....
- Multiply the volume from B.....Cubic feet by the figure from C.....Btu/cu.ft = Total heat required.....Btu/hour

The amount of Btu/cu.ft required is dependent on the insulation of the building and the average ambient temperature prevailing in the area where the building is situated. A building with no insulation in the area that experiences extremely adverse weather conditions may require up to 9 Btu per cu.ft

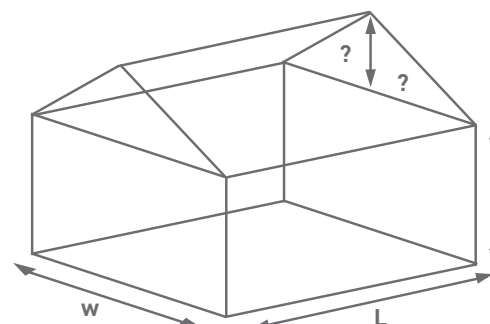

For general calculation we recommend 5 Btu per cu.ft. \* 1 cubic metre = 35 cubic feet

A comfortable working temperature is not only essential for people to work safely and productively it is a legal requirement. The amount of heat required to give comfortable working conditions depends on several factors, the most important are:

- The standard of insulation in your building
- How much warm air escapes through frequently opened doors
- The outside temperature
- 15 C°/59° F is a comfortable temperature for people who are moving about and so generating some body heat
- Calculations are based on a Delta T of 20° C, i.e. an ambient temperature of -5° C and a required temperature of +15° C

Which description best fits the building or area that you want to heat?

A	No insulation (e.g. corrugated sheet), doors frequently opened	9 Btu/cu.ft
B	Poor insulation (e.g. single skin brick/block), single glazed windows, opened fairly often	6,8 Btu/cu.ft
C	Average insulation (e.g. double skin brick/block), single glazed windows, roof insulated	5 Btu/cu.ft
D	Good insulation (e.g. blocks/cladding/insulation between), few or double-glazed windows	2,7 Btu/cu.ft

Ravaglioli was founded in 1958; Italian manufacturer and world leader of workshop equipment. Since Ravaglioli started we have utilised our in-house resources to design and manufacture our equipment (mechanics, hardware and software) combining with many years of experience. And so, we keep our products up-to-date with the market changes and needs. We look after our

products with high professionalism, our constant growth testifies this. We are proud to be 100% owners of our technology which is located within our four factories in Italy, where over 40 hardware and software R&D engineers care about their work and research and design, development, mechanics, electronic boards, writing of the necessary software's for all the controls. Possibly the largest manufacturing (company owned) factory in Europe providing a 360-degree production facility that is all totally in house.

2-post mechanical lift with  
a base frame – some Features  
Capacity 3200 kg

Our equipment is manufactured  
in **Europe** using high quality  
engineering at our **Italian factory's**.

ONLY  
**£2,875**  
Weekly from: £15.26<sup>†</sup>

Shaft transmission **requiring no maintenance**, unlike the chain driven base frame lifts that require maintenance to chain & switches with frequent adjustments. Two conic gear-boxes are **adjustment free**. The main nut is **bronze** (not plastic) so offers **high resistance to wear giving greater safety**.

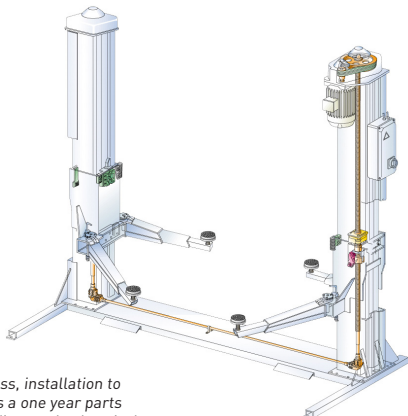

Automatic and permanent nut lubrication of the nut and screw using pots of oil above the nuts, this ensures **lubrication of the nut before** it turns through the screw. **Oil is better** than grease (other manufacturers use) for lubrication of the screw and nuts.

Steel high resistance rolled screw **provides longer life**. The solid base frame (self-supporting) is exceptional as a **solution to poor floors** offering minimum concrete floor thicknesses and poor surface anchorage etc. The columns are constructed in steel being designed to be **sturdy and strong**. Three stage arms provide asymmetric lifting **of off road and large vehicles so to easily open the doors**.

Accessories are available using our K system **quick drop** in adapters or extension pads. Available in 3-phase electrical supply as it's a mechanical lift.

**SHAFT  
DRIVE**

\*Price includes delivery to site with access, installation to a prepared site as normal. Also includes a one year parts and labour warranty, excluding any building work, electrical connections, accidental damage or miss use, floods etc.

# TPMS-THE FASTEST GROWING BUSINESS OPPORTUNITY FOR GARAGES

After the EU made Tyre Pressure Monitoring Systems (TPMS) mandatory on all newly registered vehicles from Nov 2014, demand to service and repair a vehicle's TPMS will dramatically increase as these vehicles start to reach their first M.O.T in 2018.

## Increase your revenue with the TPMS Pro & TPMS Print

Tire pressure monitoring systems (TPMS) are becoming increasingly popular, creating new service opportunities for dealers, garages and tire shops.

### DID YOU KNOW?

A faulty TPMS is an automatic M.O.T fail on cars registered after 2012.

### DID YOU KNOW?

DVSA revealed that 3.21 million vehicles with a TPMS are due their first M.O.T. in 2018.

### DID YOU KNOW?

Over 20,000 vehicles failed the M.O.T. due to a faulty TPMS in 2017.

## TAKE THE PRESSURE OUT OF TPMS WITH THE VDO TPMS PRO

### Advantages

- Efficient and easy to use with icon-based navigation
- Displays critical sensor data e.g. sensor ID, tyre pressure & battery status
- Activates universal TPMS sensors
- Resets and programs TPMS sensors on the largest selection of vehicles
- Rugged design with rubber case, suitable for any workshop
- 100% up-to-date 100% of the time with monthly updates
- Print data for your customer with the TPMS Pro Printer

### The Bosch KTS 590

Optimally suited for the use of the diagnostic software ESI[tronic] 2.0, the Bosch KTS 590 can operate several vehicle interfaces in parallel so vehicle manufacturer portals for diagnostics and reprogramming according to Euro 5/6 (PassThru) can be operated efficiently. In the future, parallel communication on various vehicle interfaces (incl. Ethernet) is a must for ambitious workshops.

### Stay up-to-date

- New vehicle models are available in ESI[tronic] 2.0 with coverage, as soon as six months after their market launch
- Online (intermediate) updates available, which run silently in the background with no user intervention required
- Updates also available to install via DVD

### Efficient overall package for control unit diagnosis, maintenance, troubleshooting and repair

With a more powerful processor (4 GB RAM, 256 GB SSD) and in conjunction with the Windows 10 operating system, the program starts quickly and works faster. It is versatile and ideal as an all-in-one tester for independent workshops or as a second device for mobile usage.

- Mobile all-round solution:** control unit diagnosis, troubleshooting, repair and maintenance
- Support of all current vehicle interfaces based on Ethernet and parallel operation of several BUS systems
- PassThru interface for programming the control units on the portals of the vehicle manufacturer as per Euro 5/6
- Plug & play through the pre-installed and configured application ESI[tronic] 2.0

ALLIANCE & GENERAL LEASING LIMITED

# Why lease?

• *Garage Equipment* • *Diagnostics*

**INVEST FOR THE FUTURE**

***A sensible alternative to depleting cash reserves***

**1**

**Let the Equipment pay for itself**

Earn from your equipment as you pay for it - instead of paying up front in full, then trying to recoup the investment over coming months or years. Spread the cost of your equipment over its useful working life.

***Why leasing makes good business sense***

**2**

**100% Tax Allowable**

Lease rentals are 100% allowable against your pre-tax profits. You can offset the total cost during the lease period, deducting payments as a trading expense.

***The perfect way to fund the growth of your business***

**3**

**Access the latest technology now**

Invest in tomorrow's technology today. Leasing can fund the latest diagnostic & workshop equipment to enable you to win lucrative new business.
